FREE CYBERSECURITY CAREER RESOURCES

Helping people take their first steps into cybersecurity.

Cyberend is a UK-focused website that helps beginners, students, graduates, career changers and people returning to work take their first steps towards a cybersecurity job. We explain the career paths, the skills employers ask for and the realistic routes in, in plain English, and list current UK cybersecurity jobs, including graduate and entry-level roles.

www.cyberend.io

Who Cyberend helps

Students

What the jobs are, which skills to start on, and practical projects to build alongside a course.

Graduates

Graduate schemes, entry-level roles and how to write a CV when you don't have security experience yet.

Career changers

How existing experience maps to security roles, and how to show it on a CV and in interviews.

Unemployed adults

Free courses, Skills Bootcamps and apprenticeships open to adults, and starting points that don't need a degree.

Young people exploring careers

Apprenticeships and routes in after school, plus a guide for the parents and carers supporting them.

The free career resources

01 **Beginner roadmap**
A 20-page plan from the basics to applying for a first role, sent free by email.

02 **Career guides**
Career paths, getting a first job, interviews, apprenticeships and a guide for parents.

03 **CV preparation**
Section-by-section CV advice with a free, editable Word template.

04 **Free learning resources**
Free courses and which certifications are worth considering, and when.

05 **Practical projects**
Beginner portfolio projects that show employers what someone can do.

06 **Job opportunities**
Current UK cybersecurity jobs, including graduate schemes, apprenticeships and junior roles.

Longer description

FOR CAREERS PORTALS AND RESOURCE LISTINGS

Cyberend: free cybersecurity career resources

Cyberend is a UK-focused website that helps students, graduates, career changers and people returning to work take their first steps towards a cybersecurity job. Its career guides explain, in plain English, the main cybersecurity career paths, how to get a first job, how to write a cybersecurity CV (with a free editable template), which free courses and certifications are worth considering, practical portfolio projects, interview preparation and UK apprenticeships. There is also a free beginner roadmap and a guide for parents and carers.

Cyberend's jobs board lists current UK cybersecurity roles, including graduate schemes, apprenticeships and junior positions. The career guides are free to access, with no account required, and each guide lists the sources behind its figures.

How to share the resources

1. **Add a link.** List Cyberend on your careers portal or resources page, using the longer description.
2. **Include it in a bulletin.** Add the short description to a careers newsletter, student bulletin or community mailing.
3. **Post it.** Share the suggested post on LinkedIn or your community channels.
4. **Print the pack.** Hand it out, or show its QR code, at careers fairs, workshops and drop-in sessions.
5. **Point people to one guide.** Send someone straight to the guide that fits their situation.

No sign-up or permission is needed to link to or recommend these resources.

Cyberend is independent. It is not a training provider, and is not endorsed by or affiliated with any university, college or employer.
